About Me

From the moment I produced "Hello World" in my first application, I was hooked into the world of web development. I had a great opportunity learning front and back end at the vocational school. This let me dive into whole new world and it has been offered an engaging challenge to continually learn and improve my skills in creating high-quality application. Web development has never been just a job or study for me, it made my passion bigger and I have got more excited about making projects as the days go by.

Experience

Personal Portfolio website

- ▶ HTML, CSS, Bootstrap, JQuery
- ▶ Responsive, single page website
